

# Let's Have A Real Conversation About Enterprise Agentic AI

Rather than duct-taping new technology onto a legacy platform or building an LLM-only approach, we've leveraged our 20+ years of linguistic and AI expertise to rebuild from the ground-up into the industry's most advanced modern AI platform for the enterprise.

## AI Deployments

### The Old Way

#### ✘ Data Chaos

Disparate systems create messy, outdated data. Consuming time, money, and locking you into inflexible vendors.

#### ✘ AI Agent Frustration

Projects drag on with underperforming AI Agents that never make it past pilot or fail to deliver measurable ROI.

#### ✘ Lacking Governance

LLM-only and duct-taped solutions lack the governance, security, and reliability enterprises demand.

#### ✘ Planned Obsolescence

As technology advances, legacy systems degrade, requiring millions in upkeep just to stay operational.

### The Inbenta Way

#### ✔ Data Simplicity

Your data stays where it is. We connect directly and continuously sync to the most current version, with multi-vendor compatibility.

#### ✔ AI Agent Delight

The best AI Agents in the market. With as much as 90%+ problem resolution within 30 days of deployment.

#### ✔ Enterprise Governance

Modern architecture with built-in safety, auditability, and control. Ensuring scalability and compliance from day one.

#### ✔ Planned Durability

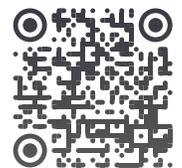

Your experience continuously improves as technology evolves. Faster, easier, and more efficient, automatically.

## Reimagine conversational AI
